

Hello. My name is Byoung-bae Min. I'm a doctoral candidate at clinical psychology program in Seoul National University, Seoul, Korea.

I'm writing my doctoral thesis and it is about the similarity and distinctiveness of obsessives and worriers. I'm so impressed by your theory of control. I've read your book, "Control Therapy", and I've found the Shapiro Control Inventory in your book. The Inventory seems to be a very important one for my thesis. I would like to translate the measure into Korean and use it in my research.
