

> Dr. Shapiro,

> My name is Mark Williams, I am a clinical psychology Ph.D. student at UT  
> Southwestern. I talked  
> to you several months ago regarding the SCI and would like to extend  
> research on this instrument  
> by using it to assess the various domains of control in a population of  
> alcohol dependent ~~patient~~  
> patients. I have reviewed the manual and noted that the protocols must be  
> sent away and  
> computer scored. I plan to administer the instrument to 60 subjects (30  
> alcoholics, 30 controls)  
> and was curious as to

> In the next week or so I will endeavor to develop various hypothesis of how  
> I believe  
> alcoholics will score on this instrument. I was wondering whether I could  
> run my thoughts by  
> you and elicit feedback? I know you are busy, and understand if you do not  
> have the time, but I  
> think this instrument is a vast improvement over earlier measures (Rotter IE,  
> DRIE) and shows  
> considerable promise in the areas of treatment planning and relapse  
> prevention with alcoholics.  
> Any thoughts or advise you could give me would be greatly appreciated.

> Regards
